Ujjain

PROJECTS

YouTube Transcript Summarizer
YouTube Transcript Summarizer is a web application built using HTML, CSS, JavaScript and Flask framework. It integrates with the YouTube Transcript API to fetch video transcripts and summarizes them automatically.
I'll input a YouTube video URL, and our application will fetch its transcript and generate a summary. In conclusion, our project streamlines the process of summarizing YouTube transcripts. It saves time, improves productivity, and enhances the overall user experience.

TRAINING

Web Development,
Acmegrade
I am completed the Web development training course at Acmegrade where I learn the Web development technologies like HTML, CSS, javascript and php by using this technologies also build an responsive e-commerce website.
